EDUCATION

- **ITMO University**

Bachelor in Computer Science; GPA: 4.50 / 5.00

St. Petersburg, Russia

Sep 2017 – Jun 2021

EXPERIENCE

- **ecom.tech**

Frontend Developer

St. Petersburg, Russia

Aug 2022 – Present

- Led the end-to-end launch process for 2 web products within the client support domain of 1000+ unique users, overseeing all phases from inception to MVP release.
- Provided supervision, leadership, and mentorship to a 3 new team members to achieve high performance and deliver MVP in time.
- Worked on Frontend stack set of JS technologies using Typescript, ES6/ESNext, ReactJS, GraphQL, Zustand, SASS, Jest, Webpack and Storybook in Agile/Scrum based project.
- Developed performant table rendering code that deals with large data sets to render components on UI and optimize calls to API both to minimize http requests and make parallel http calls to reduce loading latency by 100%.

- **Market Logic Software**

Senior Software Engineer

Sofia, Bulgaria

Jan 2014 – Oct 2016

- Contributed to the development of 5 web platform micro-frontend modules utilizing TypeScript, React, and Redux within a collaborative team of 8 developers, serving a 100+ business customers worldwide.
- Implemented comprehensive frontend code refactoring, resulting in a massive decrease in monthly new bug reports from 50 to 20 in average.
- Identified and resolved performance and scalability issues, resulting in a 25% speed-up in page load speed (FCP and bunch of other Lighthouse metrics) leads to increase in user engagement.
- Implemented a frontend platform toolkit to optimize development processes, enhance code accuracy, and standardize the codebase, resulting in a significant reduction in development time and dev team satisfying rate.

- **Bimdata**

Fullstack Software Engineer

St. Petersburg, Russia

Jan 2020 – Aug 2022

- Development of a Software as a Service (SaaS) solution tailored for construction builders, achieving a valuation exceeding \$5 million.
- Established Gitlab CI/CD pipelines for multiple products, ensuring efficient release management and publication processes, reducing release time cycles by 28%.
- Implemented a comprehensive reusable component library, leading to a notable 40% decrease in development time.
- Worked on a platform product team to implement micro-frontend architecture using Single-SPA to incorporate set of products into a unified cloud based application.
- Provided project estimates, support escalations and production issues, deployed projects to internal and production environments and achieved 95% delivery of features that met SLAs in time.
- Integration of 3D model viewer to React application, used Three.js and Pixi.js to render 3D models.

SKILLS

• **Languages:** Scala, Python, JavaScript, C++, SQL, Java

Technologies: AWS, Play, React, Kafka, GCE
